Kochański & Partners: We have supported ERGO Hestia in the certification process

ERGO Hestia is one of the biggest players in the insurance sector, a leader in InsurTech and the creator of many innovative solutions. And since technology is in our law firm's DNA, for us, supporting our partner and client in the ISO 27001 and ISO 27017 certification process was not only an ambitious legal challenge, but above all a joint, interesting and inspiring project .

Cybersecurity and digital risks issues are now the absolute number one in all processes for any organisation. And ISO certifications are an internationally recognised confirmation of a mature security system and approach to protecting client data. The ones just obtained by Hestia place it among Europe's leading organisations. More joint projects lie ahead. We will make sure that ERGO Hestia becomes a permanent fixture in the global top tier of insurers.
