Energy | Support scheme for energy-intensive industries in relation to natural gas and electricity prices

Up to EUR 40 million will be made available to energy-intensive industrial enterprises to cover electricity purchase costs.

A PLN 5.5 billion support scheme will be launched in August.

Under the scheme, enterprises can apply for two types of support – basic and enhanced – depending on the fulfilment of certain conditions.

They will have only 14 days to submit their e-application and funds will be disbursed in two rounds within two months of the call being launched in the form of a refund for the 1st and 2nd half of 2023 and, in the case of enhanced support, in the form of an advance for the whole of 2023.

Deadlines, specific conditions and restrictions are discussed by Wojciech Wrochna, Jacek Kozikowski, and Aleksandra Pinkas.
