

1. Legal Project Management: why you need a legal project manager

The globalisation of legal services, changing market realities and increasing competition have made a project-based approach to the delivery of legal services, i.e. Legal Project Management, a global standard.

This is particularly evident in the UK and the US, says Magdalena Papiernik-König of Kochański & Partners, listing the benefits that the use of LPM techniques and methods brings to clients, their cases and law firms.

And since the Kochanski & Partners expert is also a certified Legal Project Practitioner™, accredited by the International Institute of Legal Project Management, you can trust her judgement.

2. A robot instead of an HR department, or AI in employment law

The development of new technologies and artificial intelligence is certainly streamlining and in many cases even automating an increasing number of processes, including in HR. And yet, some solutions raise significant reservations and concerns. Particularly when it comes to high-risk areas, such as recruitment, promotion or dismissal decisions. After all, the use of these systems has a direct impact on our lives and finances.

This needs to be regulated, emphasises Magdalena Nurzyńska-Sawicka of Kochański & Partners Labor Law Practice, and looks at specific proposals of a draft EU regulation. She also discusses the current legislation and the resulting obligations for employers, of which they are not always aware.

3. New fuels make airports greener

We are moving towards a massive decarbonisation of the European aviation sector. Aircraft will increasingly fly on green fuels, which may require changes in infrastructure and airport organisation

On 9 October 2023, the Council of the EU adopted the Regulation on ensuring a level playing field for sustainable aviation (ReFuelEU Aviation). This is an ambitious first step towards a greener aviation sector. However, it may require additional investment. It is therefore worth knowing what lies ahead.

Jacek Kozikowski and Bartosz Brzyski, lawyers **from** Kochanski & Partners, write about the coming aviation fuel revolution and innovations in aviation that can make flying greener.
